Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claim 1 is objected to because the recitation of the term "the part" (line 7) does not have proper antecedent basis since a plurality of parts are recited. Appropriate correction is required.

Claim 2 is objected to because "the fuel tank band" does not have proper antecedent basis.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Kawai (U.S. Patent 6,164,603).

Kawai teaches an attaching device for attaching a part (50) to a band (60) comprising a clip main member (1) having interengaging first and second parts (40, 10).

There are elastically pressing portions (Figures 3A, 3B).

Each part has elastically projecting pressing portions (43, 11).

Each part has engagement means (42, 43, 44).

There is a hinge portion (Figure 2A, for example).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6, 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kawai, as applied above.

Regarding claim 6, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have made the device of Kawai separately in order to better suit a particular application. Note that making an integrally formed structure separate is not patentable subject matter.

Kawai does not specify the fuel tank band; however, it is well known to use bands to fix fuel tanks. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have used Kawai with a fuel tank band in order to obtain a desired connection.

Bands having a varied cross section are well known. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have used a band having a varied cross section with Kawai in order to properly fit a particular application.
